Alpharetta, GA 30004

Subject: Label Amendment – Multiple changes to label  
Product Name: AW35-36  
EPA Registration Number: 1258-1342  
Application Date: November 7, 2016  
Decision Number: 524125

Dear Ms. Holcombe:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Page 2 of 2  
EPA Reg. No. 1258-1342  
Decision No. 524125

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Melanie Bolden by phone at (703) 347-0165, or via email at [Bolden.Melanie@epa.gov](mailto:Bolden.Melanie@epa.gov).

Sincerely,

A handwritten signature in blue ink that reads "Wanda J. Fuller, for". The signature is written in a cursive style.

Demson Fuller, Product Manager 32  
Regulatory Management Branch II  
Antimicrobials Division (7510P)  
Office of Pesticide Programs

Enclosure

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER: Corrosive.** Causes irreversible eye damage. Causes eye and skin burns. May be fatal if inhaled or absorbed through skin. Harmful if swallowed. Irritating to nose and throat.

- [.] Open in a well-ventilated area. Avoid breathing dust and fumes.
- [.] Do not get in eyes, on skin or on clothing. Wear goggles and rubber gloves. For additional protection of skin, wear long sleeves and long pants.
- [.] Wash hands after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
- [.] Remove contaminated clothing and wash clothing before reuse.

### FIRST AID:

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

**IN CASE OF EMERGENCY CALL: 1-800-654-6911**

### PHYSICAL AND CHEMICAL HAZARDS:

**DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add only into water.**

[.] [Do not mix this product with a small amount of water. Only add this product directly to your pool.] *{This statement will appear on Pool use labels only.}*

[.] Do not allow to become wet or damp before use.

**Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.**

[.] Keep all foreign matter, including other water treatment products, away from this product.

[.] Use only clean and dry utensils to dispense this product.

[.] Do not allow this product to contact other water treatment products. If used in a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer.

[.] Avoid spilling this product.

**Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.**

[.] Store in a cool, dry, well-ventilated area away from heat or open flame.

**Strong oxidizing agent. This product can increase fire intensity.**

[.] Keep away from heat and from flame and burning material (like a lighted cigarette).

*{First sentence of paragraph below for containers 50 lb. or less; complete paragraph for all other sizes}*

**ENVIRONMENTAL HAZARDS:**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

*{Household/residential use products}*

**STORAGE AND DISPOSAL:**

**Pesticide Storage:**

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame.

**Pesticide Disposal:**

Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. If not, discard in trash. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.

**EMERGENCY HANDLING:** In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **Read all precautionary statements and first aid statements before use.**

[For crystal clear pool water, follow our 4 step pool care program: Step 1: Test and balance pool water, Step 2: Sanitize, Step 3: Shock at least once a week, and Step 4: Add algaecide as directed by that product.]

**METHOD OF APPLICATION:** Use in a floating dispenser, automatic chlorinator, or feeder designed for this product, or place in skimmer. Use in a new chlorinating device or any device which has previously contained only this product or trichloro-s-triazinetrione. If placed in the skimmer, run the pump a minimum of eight hours daily. **DO NOT** Use in floaters or feeders that have been used with other water treatment products. **DO NOT** Throw tablets directly into pool. **DO NOT** Permit tablets to contact plastic pool linings or metal objects. **DO NOT** Use in any chlorinating device which has been used with other chlorinating compounds.

**WATER BALANCE:**

[To provide optimum product performance, swimmer comfort and crystal clear water always maintain pH from 7.2 to 7.6, total alkalinity from 80 to 120 parts per million (ppm), and calcium hardness above 200 ppm. Test frequently using an HTH test kit that measures all these ranges. Make any necessary adjustments promptly with the appropriate HTH pool care products. Re-entry into treated pools is prohibited with chlorine levels above 4 ppm for risk of bodily injury.]

{or}

[Adjust and maintain pool water pH from 7.2 to 7.6, total alkalinity from 80 to 120 parts per million (ppm) and calcium hardness above 200 ppm. Test frequently using a[n] [brand] [test kit] [or] [test strips] that measure[s] all of the above ranges. [Bring a pool water sample to your [brand] dealer frequently to test for water balance.] Maintain free available chlorine between 1 - 4 ppm [using a stabilized chlorine product] {or} [brand granular shock].

**OPENING YOUR POOL:** Balance pool water, shock treat, and stabilize your pool using [brand] Stabilizer & Conditioner and by following directions on that label. Then follow "ROUTINE CHLORINATION" directions.

**ROUTINE CHLORINATION:**

*{For single tablet pack}*

Follow "METHOD OF APPLICATION". Add one tablet per 10,000 gallons of pool water every week or as often as needed to maintain a chlorine residual at 1–4 ppm. This dosage may vary depending upon bather load, water temperature and other conditions. Pool must not be entered until the chlorine residual is 1–4 ppm as measured with a reliable test kit.

*{Directions for use with tablet form of this product in skimmer or floater}*

[Ensure that the skimmer basket or floater is free of any other chemicals, tablets, or residue. Place this product in the skimmer basket or floater. Use one tablet per 10,000 gallons of water. Do not add other chemicals to the skimmer or floater while this product is present. Run filter pump a minimum of 8 hours per day, otherwise vinyl liner damage may occur. If free available chlorine goes above 4 ppm, reduce skimmer flow rate or daily pump operation time. Reentry into treated swimming pool is prohibited above levels of 4 ppm free available chlorine due to risk of bodily injury. If chlorine residual goes below 1 ppm, add enough [brand] granular shock to maintain 1-4 ppm of chlorine, and increase skimmer flow rate or daily pump operation time. The number of [tablets\*] and frequency of use will vary with bather load, water temperature, rain, and pump operating time.]

*{Directions for use with cartridge form of this product in a [brand] feeder}*

[Turn off filter pump. Open [brand] feeder, remove cartridge container and allow any water remaining in the empty cartridge to drain back into the feeder. Dispose of empty cartridge material. Refill cartridge container with new [AW35-36 or other brand] cartridge. Replace cartridge container, then close the feeder and turn filter pump back on. Set chlorine delivery rate to maintain available chlorine at 1 – 4 ppm.

After 24 hours check chlorine residual level with a test [kit [or] strip]. If free available chlorine is above 4 ppm, reduce the feed rate and retest in 24 hours. Reentry into treated swimming pools is prohibited above levels of 4 ppm free available chlorine due to risk of bodily injury.

Test chlorine residual on a regular basis, and if below 1 ppm free available chlorine, increase dial setting. Be sure to refill cartridge when contents are fully dissolved.]

**{OPTIONAL MARKETING CONTENT}**

**{Clarity /Softness}**

[Clarifies pool water]  
[Contains a [clarifier][filter aid]]  
[Contains clarifying additive]  
[Delivers sparkling [pool] water]  
[For crystal clear, sparkling blue water]  
[Keeps pool water clean [and][&] crystal clear]  
[Keeps [pool] water clear]  
[Keeps [your] pool clear blue]  
[Maintains brilliantly clear water]  
[[Produces] sparkling [clean swimming] pool water]

**[WHY YOU SHOULD USE THIS PRODUCT]:** [AW35-36 or other brand] [tablet[s]\*]<sup>1</sup> are a unique and effective pool water sanitizer. [Routine sanitization is important to keep your pool water free of bacteria and contaminants.] [These convenient and easy to use [BRAND] [chlorinating] [tablet[s)\*] are formulated to protect against chlorine loss in direct sunlight, and can be used in skimmers, [and] floaters [and feeders]. [In addition to sanitizing, [brand] [tablets] prevent algae growth and clarify your pool water.] [They are designed to dissolve slowly to provide a steady source of available chlorine.]

[ ] [ ]

TO DETERMINE POOL CAPACITY IN U.S. GALLONS	
Use the appropriate formula below	
POOL SHAPE	FORMULA (Use measurement in feet)
Rectangular:	Length x width x average depth x 7.5 = total gallons
Round:	Diameter x diameter x average depth x 5.9 = total gallons
Oval:	Maximum length x maximum width x average depth x 5.9 = total gallons
Freeform:	Surface area (sq. feet) x average depth x 7.5 = total gallons

[ ]

HOW TO CALCULATE POOL CAPACITY IN U.S. GALLONS	
POOL SHAPE	FORMULA (Dimensions in feet)
Rectangular:	L x W x AD x 7.5 = total gallons
Round:	Di x Di x AD x 5.9 = total gallons
Oval:	Maximum L x maximum W x AD x 5.9 = total gallons
Freeform:	Surface area (sq. feet) x AD x 7.5 = total gallons

L = Length, W = Width, AD = Average Depth, Di = Diameter]  
 [To calculate your pool's capacity, visit [hthpools.com/XXXX](http://hthpools.com/XXXX).]

**{Optional marketing statements that may be used with pool sanitization with 3 inch tablets.}**

### ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms.

*{Household/residential use products}*

**STORAGE AND DISPOSAL:**

**Pesticide Storage:**

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame.

**Pesticide Disposal:**

Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. If not, discard in trash. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.

**EMERGENCY HANDLING:** In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **Read all precautionary statements and first aid statements before use.**

{Note to reviewer: large floater treats up to 15,000 gallons, small floater treats up to 10,000 gallons}

**[HOW TO USE:] [METHOD OF APPLICATION:]**

[The][product name][This product][This floater] is a single-use chlorine dispenser that treats up to [10,000][15,000] gallons of water [25 days][3 weeks][for weeks]. It sanitizes, prevents algae and stabilizes pool water. **Do not allow contents of floater to get damp or wet before use. Do not allow contents of floater to contact other water treatment products.**

[Simply:]

- [Tear perforated edge.] [Tear Here][Remove the plastic sleeve by tearing along the perforated edge.]  
{Note: The following statement is required to appear on a container label only if perforation allows for full removal of label.} **[Keep the label for future reference.]**
- [To Open: Squeeze tabs on side of base and twist counter clockwise to expose openings.]
- [Twist dial to medium setting.][Twist the base dial to the medium setting and adjust up or down, based on chlorine level [needed].]
- [Place [the] [floater] in your pool.] [[The][product name] [This product] dispenses the chlorine needed to keep your pool clear and blue.]
- Test free available chlorine residual with [a][an][brand] [pool] test [kit] [[or] [test] strip[s]]. Do not enter pool until the free available chlorine residual is 1- 4 ppm.
- [[If needed,] [Next,] shock pool immediately with [brand] shock product and weekly thereafter while the floater is in use.]
- [Adjust dial up or down, depending on chlorine level [needed].][You may adjust the opening at the bottom of your floater depending on the chlorine reading in the pool. For optimum performance, dial down the floater one [setting][position][opening] if testing indicates a chlorine level above 4 ppm or dial up the floater one [setting][position][opening] if testing indicates a chlorine level drops below 1 ppm.]  
{OR}

For Optimum Performance	
If chlorine level is > 4	Twist dial down one [setting][position][click][opening]
If chlorine level is < 1	Twist dial up one [setting][position][click][opening]

- [Replace floater when it has tipped onto its side.][(Floater will tip gradually as it empties.)][Do not discard floater until it is completely empty.]
- Regular water testing is recommended to insure proper chlorine levels are maintained.

**NOTE: Do not remove from pool until floater it is completely empty and residual water drains into the pool. [Shake floater gently to insure [contents of floater][all tablets] have completely dissolved. Do not refill. This is a single-use floater.**

[A shock treatment will be needed each week while the floater is in use.] [See “SHOCK TREATMENT/SUPERCHLORINATION” section.]

**[WATER BALANCE:**

[Adjust and maintain total alkalinity from 80 to 120 parts per million (ppm), pH from 7.2 to 7.6, and calcium hardness above 200 ppm. [Always check and adjust total alkalinity before adjusting pH levels.] Test frequently using [a brand] [test kit] [or] [test strips] that measure[s] all of the above ranges. [Follow label directions and adjust with appropriate product.]

[[Download the [FREE] [Test to Swim™] [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

[Visit a Test to Swim™ Station, at participating retailers, for expert water analysis, product recommendations and dosage instructions. [To find a participating retailer near you, visit [www.hthpools.com/XXX](http://www.hthpools.com/XXX)].]

[Use a Test to Swim™ Station (at participating retailers) or download the Test to Swim™ [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

{or}

{Chart may be used in whole or part}

[Adjust and maintain pool water to recommended ranges:

Acceptable Range for Balance	
Total Alkalinity	80-120 ppm
pH	7.2-7.6
Calcium Hardness	Above 200 ppm
Available Chlorine	1-4 ppm
Cyanuric Acid	20-50 ppm

NOTE: Always check and adjust total alkalinity before adjusting pH levels. {The following sentence will appear on the final graphic label only if cyanuric acid is included in the chart} [High cyanuric acid levels (100 ppm and above) may result in insufficient free chlorine and harmful bacteria in your pool water.]] ]

#### **[OPENING YOUR POOL:**

[[Balance pool water per levels in WATER BALANCE section. Shock treat with a [brand] shock product and stabilize your pool using [brand] stabilizer. Follow label directions for each of these products.]

{or}

[Balance pool water, shock treat, and stabilize your pool using [brand] Stabilizer, following label directions.]]

[Pools that exceed [10,000][15,000] gallons may require the use of [multiple floaters][more than one floater] ]

#### **[SHOCK TREATMENT/SUPERCHLORINATION:**

As a preventative treatment, shock treat your pool once per week [with [brand] shock treatment]. Additional shock treatments may be necessary to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms, or if algae does develop with resulting green color and slimy feeling.]

[Test free available chlorine residual with [a][an][brand] [pool] test [kit] [[or] [test] strip[s]]. Do not enter pool until the free available chlorine residual is 1- 4 ppm. **Re-entry into treated swimming pool is prohibited at available chlorine levels above 4 ppm due to risk of bodily harm.**]

[We recommend using [hth® time to shock? test strips] [Brand test strips] to determine if additional shock treatments are necessary, outside of the recommended weekly treatments.]

#### **[FOR POOLS WITH VISIBLE ALGAE:**

If your pool has visible algae, a separate algae treatment may be necessary. Use a[n] [brand] algaecide per label directions to rid your pool of visible algae.]

TO DETERMINE POOL CAPACITY IN U.S. GALLONS Use the appropriate formula below	
POOL SHAPE	FORMULA (Use measurement in feet)
Rectangular:	Length x width x average depth x 7.5 = total gallons
Round:	Diameter x diameter x average depth x 5.9 = total gallons
Oval:	Maximum length x maximum width x average depth x 5.9 = total gallons
Freeform:	Surface area (sq. feet) x average depth x 7.5 = total gallons

HOW TO CALCULATE POOL CAPACITY IN U.S. GALLONS	
POOL SHAPE	FORMULA (Dimensions in feet)
Rectangular:	L x W x AD x 7.5 = total gallons
Round:	Di x Di x AD x 5.9 = total gallons
Oval:	Maximum L x maximum W x AD x 5.9 = total gallons
Freeform:	Surface area (sq. feet) x AD x 7.5 = total gallons

L = Length, W = Width, AD = Average Depth, Di = Diameter]  
 [To calculate your pool's capacity, visit [hthpools.com/XXXX](http://hthpools.com/XXXX).]

**Approved alternate brand name:**

Poolife Exclusive Pool Care Collection MPT Extra

**Proposed alternate brand names:**

HTH Multi-Action Small Pool Floater

HTH Multi-Action Large Pool Floater
